EDUCATION

Hong Kong University of Science and Technology
BBA in Information Systems

Hong Kong
September 2024 - June 2028

WORK EXPERIENCE

Africa Center

Nonprofit Social Enterprise
Business Development

Hong Kong
July 2025 - August 2025

- Supported operational and financial processes within the organization, gaining exposure to nonprofit management and partnership coordination. In-depth interaction with the benefits of the social enterprise model, along with its constraints. Assisted in communications and collaboration with event organizers in planning booth appearances.

Corporate Social Responsibility

- Led the intern team in preparing and submitting funding applications to multiple grant sources supporting nonprofit programs. Successfully presented to potential partners of the organization, and able to work with the founder in project creation and execution of product launch.
- Visited multiple schools and social gatherings to promote projects that required community backing. Worked and communicated with project partners in implementing a database of unique cultural stores based in Hong Kong.
- Contributed to the development and execution of five community-focused social initiatives aimed at supporting underserved groups in Hong Kong.

LEADERSHIP & EXTRA-CURRICULAR EXPERIENCE

Business Student Association

Member

Hong Kong
September 2025 - Current

- Participated in organizational initiatives and networking events aimed at developing business leadership and professional skills among students.

GBA Fintech Talent Initiative 2025

- Selected to participate in a fintech exposure program organized by Bloomberg, engaged with leading financial technology firms across the Greater Bay Area.
- Gained exposure to the varied uses of fintech in the market. Interacted with developers and discussed the future of fintech applications with: digital banking with ZA Bank, the requirements of online banking taught by J.P. Morgan with experts, as well as its effects within asset management headed by CSOP.

Hong Kong

PROJECTS & CODING EXPERIENCE

Webscraping

- Successfully developed a website scraper dedicated to extracting articles from the Wall Street Journal and classifying data into individual sentiments and identifying sentiment trends. Using a mix of BeautifulSoup and extraction tools like crawl4ai to bypass authentication, while FINBERT to classify and transform into effective data.

Simulated Portfolio

- Managing a simulated paper trading portfolio, focusing on equities. Applied diverse market sizing techniques along with different sentiment-driven strategies across varying macroeconomic conditions since 2021.

Machine Learning

- Worked with core machine learning workflows, including data preprocessing, feature engineering, and model training using decision trees, regression, and neural networks on a diabetes dataset. Applied model evaluation techniques such as ROC, threshold tuning, and validation methods to optimize performance. Explored both supervised and unsupervised learning approaches, including clustering, dimensionality reduction, ensemble methods, and time series forecasting for data-driven insights.
- Explored using models such as XGBoost applications towards trading and data analysis.

SKILLS AND INTERESTS

Skills: Python, Pandas, Analytics with Sklearn, Excel, PowerPoint, Git

Languages: English (Native), Filipino (Native), Mandarin (Conversational)

Interests: Climbing, Cooking, Running
